SUMMER HOLIDAY HOMEWORK
CLASS VI

Dear Parent,

Warm greetings. For the past 2 months we enjoyed taking care of your precious children. You might have noticed that they all loved to come to school. For the next two months, you their natural guardian will spend the vacation with them. Let's share some tips to make this period a fruitful and happy period for them.

1. Have at least two meals together with your children. Teach them the importance and hard work of the farmers and ask them not to waste their food.
2. Let them wash their own plates after every meal. Children learn dignity of labour from such activities.
3. Allow them to help you in cooking. Let them make their own vegetables and fruit salad
4. Make your child read and write 5 stories in English notebook and then the same will be narrated in class.
5. Visit the grandparents and let your children bond with them. Their love and emotional support is very important for your child to understand that you work very hard to support the family.
6. Do meditation, yoga and enchant Gayatri Mantra daily morning at least for 10 minutes.

Q1.

Where is the Indus Valley?

The Indus Valley Civilisation was an ancient civilisation located in what is now Pakistan and northwest India. The civilisation developed on the Indus River floodplain around 5,000 years ago. The Indus River starts high up in the Himalayan Mountains and flows to the Arabian Sea.

A valley is a low area of land between hills or mountains that is shaped by a river. The Indus Valley was shaped by the Indus River.

Harappa and **Mohenjo-Daro** were both Indus Valley cities. They started as riverside farming villages. The land near a river is green and fertile. The first farmers lived by rivers so that they could grow their crops. The Indus people used the river for drinking and washing. They got from one place to another by travelling in boats up the river. Carts were also used for travelling.

Harappa, Mohenjo-Daro and Dholavira were well planned cities. They had wide streets, drains, bathing platforms, and reservoirs. They also had public and private wells. Wheat and barley were the most popular crops, however rice and peas were also grown.
